Elberta Peaches

KELLYS’ Certified True-to-Name Fruit Trees

Kelly Brothers Nurseries, Dansville, N.Y.
Kelly’s Golden
Anniversary Catalog

Fifty Years Of Honest Service
To the Fruit Growers of America

On this our Fiftieth Anniversary we
wish to thank you, as one of our many
good customers, for the valued orders you
have sent us.

By recommending us to your friends and
neighbors you have made it possible for us
to grow, from a very modest beginning in
1880 to our present huge proportions. In
appreciation of your patronage, we are
offering you this year even greater bargains
than usual. Furthermore, we assure you
of the same careful painstaking service as
has been given you in the past.

If you have not been so fortunate as to
have planted Kelly’s trees before, and
would like to have first hand, unbiased infor-
mation, write us and we will send you
the names of Kelly’s customers in your
vicinity. Visit these orchards and you will
be convinced yourself of the quality and
productiveness of Kelly’s trees.

Prices Greatly Reduced—
High Quality Maintained

In anticipation of our Golden Anniversary
Year, we have grown for you an abun-
dance of the finest trees and bushes in
America. We are celebrating our fifty
years in business by a big reduction in
prices, especially on the two leading com-
mercial fruits, Apples and Peaches. We
challenge a comparison both in quality and
prices. Nowhere can such splendid trees be
purchased at such bargain prices. Take
advantage of this real opportunity by pur-
chasing at once. At these low prices our
supply of trees will not last long.

Do not overlook our SPECIAL LOW PRICES
on Apples, Peaches, Bartlett Pears, Spiraea Van
Houtteii, Hydrangea Snowball E. B., Bechtel’s
Flowering Crab, Norway Spruce, American
Arbor Vitae, California Privet, Barberry Thun-
bergii, Butterfly Bush.

Now is the time for commercial orchard-
ists to increase the productiveness of their
orchards and gardens by a windbreak of
Norway Spruce and American Arbor Vitae.
Why You Pay Less When You Buy From Kelly’s

Nurseries Favorably Located

Our nurseries are located in one of the most favorable spots to be found anywhere in the country. It isn’t just a happenstance that Dansville is one of the largest nursery centers in the world. The soil and climatic conditions in this vicinity are such that trees of the highest quality can be grown at a minimum of expense in labor and fertilizer. Nowhere can trees be grown with cleaner, straighter bodies—better balanced tops—or more abundant fibrous roots. So favorable are conditions here that nurserymen from as far west as Missouri and Iowa come to Dansville to have their trees grown for them.

Kelly’s Have Years of Experience

Nursery work is highly specialized work. It requires men of expert knowledge and thorough experience. During our fifty years in business we have built up an organization of thoroughly competent men. Men who can and do produce trees of unsurpassed quality. We gladly welcome comparison.

You Buy Trees Direct From Nursery

Buying through our catalog you have only one profit to pay. When trees are bought through jobbers, dealers, agents and stores very often three or four profits must be paid. Half your money is wasted by repeated handling which instead of being a benefit to you is really detrimental. The less your trees are handled the better condition they will reach you in and the less chance there will be of mistakes. Buying direct from us means better trees and the most for your money.

Trees Certified True to Name

As you will note by referring to page 53 of this catalog every department from the propagating, digging, and packing to the selling by catalog is under the direct supervision of a member of the firm. This careful supervision means the elimination of all risk of mixtures in varieties. Not content with this we have our trees certified true to name by Dr. J. K. Shaw of the Mass. Fruit Growers Association and a seal affixed to each tree so certified. Greater care than this would be an impossibility.

We Guarantee Satisfaction

After all is said and done “the proof of the pudding is in the eating.” Purchase your trees from us this year and if when you receive them they are not fully up to standard, notify us at once and we will see that complete satisfaction is accorded you.

Kelly Brothers Nurseries
Dansville, New York
Kelly’s Trees Assure You Quality Fruit

Why You Take No Chances When You Do Business With Kelly Bros.

KELLY’S REPUTATION AND RESPONSIBILITY IS YOUR ASSURANCE OF CONFIDENCE IN BUYING

There are two big reasons why, to be safe, you must base your purchase of fruit trees upon the reputation of the nursery from which you buy. First, you cannot tell by inspection what kind of fruit a tree will produce. Second, the price you pay is no indication of a tree’s quality or grade.

Buy True-to-Name Trees—Kelly Nurseries Specialize in Big, Strong, Vigorous Rooted Trees That Grow

When you buy trees from us you do it with confidence that after you plant the trees and care for them, spending your time, labor and land on them, your Kelly trees will surely bear fruit true to name for you, the same as they have done for so many thousands of other fruit growers.

Thousands of Kelly Trees Inspected and Labeled in 1930

You don’t need to worry about getting the right variety of trees when you do business with us. Thousands of Kelly Trees have been inspected and certified to be true to name, for the 1930 season, by a corps of expert examiners from the Massachusetts Fruit Growers’ Association. They have placed an official tag on each tree which certifies that the tree is true to name. The tag bears the name of the true variety it will produce and stays on the tree until it fruits. This tag is fastened on the tree, to remain there until you get true-to-name fruit, as guaranteed by us.

And we do not stop when we have these disinterested examiners inspect our trees. Three resident New York State Inspectors make frequent inspections of our stock from seedling to railroad car.

Fifty Years Dollar-for-Dollar Value

For fifty years Kelly Brothers have been giving dollar-for-dollar value in fruit trees. We have sold many thousands of trees planted in every part of the country—trees that have proved real producers and profit payers. Some of these trees are growing near you and you can see them for yourself. You can talk with the owners and ask them all about our trees and Kelly Bros.’ reputation for square dealing. We urge that you write us for the names of the fruit growers in your neighborhood who have Kelly’s trees, because we know you will not hesitate to order from us after you see our trees and hear the good things our customers have to say about us.

Before You Invest—Investigate

You should buy your trees from reliable nurserymen. There are many poor trees—trees not true to name, trees with a poor root system and affected in one way or another—put on the market by unreliable firms and agents. Those who have bought and grown Kelly trees would not consider dealing with other concerns, but the buyer about to purchase his first fruit trees should be warned against the mistake of investing in such stock.

You Buy Direct from the Grower

Perhaps you will receive catalogs from nursery firms and agents quoting lower prices that ours; but, remember, many buyers have proved in the past that the price of trees is no index of their value. Be sure to investigate the responsibility and integrity of those who make you unusually attractive offers. In many cases you will find that such concerns are not able to deliver the goods as advertised by them, are not established permanently and are not likely to be in business when your trees come into bearing.

Generations of Growing Nursery Trees—With Our Guarantee Back of Every Tree

It does not pay you to use your valuable land and to devote your time to the growing of trees only to find when they fruit that you have something you did not order, something for which you have little or no use. For your own protection against the loss of land, time, labor and money, buy trees back of which stands a firm of known responsibility and honesty that has been in business for fifty years, and that will still be here when your trees produce.
Professor French Says—
“KELLY TREES True to Name”

As stated on pages 12 and 13 of this catalog, we had eleven of the leading commercial varieties of Apples Certified True to Name and sealed with a certification tag of the Massachusetts Fruit Growers Association. In addition to this we had all our salable Apple Trees examined by Professor A. P. French of the Massachusetts Agricultural College, Amherst, Mass.

The examination by Professor French was for the purpose of determining for an absolute certainty that all of our Apple Trees are strictly True to Name.

Professor French is an associate of Dr. J. K. Shaw in the certification work conducted by the Massachusetts Fruit Growers’ Association, and his ability to determine the correct variety of fruit trees is acknowledged by leading fruit growers.

The statement of Professor French appears herewith.

Statement of Inspection for Trueness-to-Name 1929
Amherst, Mass., Oct. 29, 1929
To whom it may concern:
We have examined for trueness-of-name the salable apple stock now growing in the nurseries of Kelly Brothers Nurseries of Dansville, N. Y., and we now declare that to the best of our knowledge and belief these trees are true to variety name as they stand in the nursery row.

A. P. FRENCH.

BUDDING PEACH TREES IN KELLY’S NURSERIES
Skilled workmen and careful supervision assure True to Name Trees.
KELLY’S APPLE TREES
Are A Safe Investment

IT is an established fact that of all fruits the apple is the most important. It has been rightly called the "King of Fruits." Unlike other fruits its period of ripening extends nearly throughout the year, and by judicious selection of varieties, an almost constant succession may be obtained. It is not a luxury, but a staple article of food, and the demand for good apples is increasing faster than the supply. Experienced and successful farmers and orchardists agree that there is more money growing apples than in any other fruit, and that the orchard is the farm's greatest asset. If there is any kind of trees that we specialize in growing, it is the apple. We use the very best quality of imported French Apple Seedlings on which to propagate our apples. We believe this to be of utmost importance in order that the trees may have a good foundation, be free from all disease and insure a healthy and permanent growth. We have discarded all varieties not profitable to the planter, and recommend the following varieties, giving a brief description of each.

Summer Varieties

Early McIntosh—Fruit growers are in need of an early red apple of good quality. That is what Early McIntosh is. Besides pleasing the taste, this early apple pleases the eye. The red is handsome; the uniform round-oblate shape is most attractive and permits packing in various packages in which the apples fit well and look well. The size of the fruit is about that of McIntosh and it is similar to and quite the equal of McIntosh in flavor. The trees are vigorous, hardy, healthy, productive, and bear annually. Ripens in Aug.

Early Harvest—(Yellow Harvest) Medium to large; pale yellow; beautiful; fine flavor. Tree moderate, erect grower, good bearer; excellent variety for both orchard and garden. Ripens in August.

Red Astrachan—Tree hardy and good bearer. Fruit very handsome, large, round, nearly covered with deep crimson, overspread with thick bloom; juicy and good, though rather acid; one of the best of the summer varieties for cooking. Ripens in August.

Sweet Bough—Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer. August.

Williams Early Red—Medium sized; dark red, sometimes yellow splashed; flesh is crisp, tender, juicy and sub-acid. August.

Yellow Transparent—Tree upright, and a very early and abundant bearer. Fruit of good size; skin clear white, turning to a pale yellow; flavor acid and very good. Ripens from ten days to two weeks earlier than Early Harvest. Ripens in August.

COMMERCIAL ORCHARDISTS

Buy direct from our nursery and save money.
Autumn Varieties

**Duchess of Oldenburg**—Vigorous growth; Russian; large; striped; tender, juicy, sub-acid; good; regular and abundant bearer. One of the hardiest kinds known. Ripens in September.

**Fall Pippin**—Very large, yellow, tender, juicy and rich. A general favorite as a fall cooking apple. Pleasant, aromatic flavor when eaten. Tree is vigorous, hardy and productive. Season, October to December.

**Fameuse**—(Snow Apple) Hardy, medium size; deep crimson; flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits and valuable for market. Ripens in November.

**Gravenstein**—This is a large, handsome apple streaked and splashed with red over a strong yellow. The flesh is yellowish, firm, fine, crisp, tender, juicy and sub-acid. In quality it ranks very good to best. September to November.

**Maiden’s Blush**—Of uniformly large size, smooth, round, beautifully flushed with red on creamy yellow ground; flesh tender, of pleasant but not high flavor. A good market sort because of its attractiveness and the tree’s heavy crops. Ripens in September.

**Pound Sweet**—(Pumpkin Sweet) A very large, round, yellow, russet apple, very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. October and November.

**Red Gravenstein**—This red sport is more attractive than Gravenstein. It differs from the old Gravenstein only in the solid, dark, red colored fruits. An excellent fall apple.

Winter Varieties

**Baldwin**—What the Bartlett pear is to pears the Baldwin is to apples for the Eastern and Middle states. No variety yields larger crops or bears shipment better, or is more attractive in color, size and shape than the Baldwin. It is esteemed as an eating apple, and for cooking. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy and rich; tree vigorous, upright and productive. In New England, New York, Ontario and Michigan, this is one of the most popular and profitable sorts for table or market. Keeps until April.

**Ben Davis**—A popular apple in Southern New York, Pennsylvania and Ohio. Fruit is medium to large, of a bright, deep red color, or red striped over clear yellow. Has a thin, tough skin. The flesh is whitish, firm, juicy and sub-acid. It is one of the best keeping apples on the market today, lasting in cold storage until June or July.
Apples—Winter Varieties (Continued)

WAGENER

Delicious—A remarkable variety introduced in the West several years ago, where it is being largely planted and rapidly taking first rank both for commercial and home orchards. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting, juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. Tree one of the hardest, a vigorous grower, with good foliage. A regular annual bearer. See illustration on back cover.

GRIMES' GOLDEN

Gano—Similar but superior to Ben Davis. It has all the good qualities in a higher degree, more brilliant coloring, runs more even in size and keeps fully as late. The tree is vigorous and hardy; is a rapid grower; bears while young. Color bright red without stripes or blisters, and large and even in size. Keeps until March.

Golden Russet—Vigorous growth; medium; russet; crisp, juicy, mild sub-acid; hardy; very good; long keeper. November to April.

Grimes' Golden—Vigorous grower; large; golden yellow; juicy, sprightly, sub-acid; very good. Keeps until April.

Hubbardston—(Nonesuch) This apple is one of the earliest bearers. Large, striped yellow and red; flesh yellow, juicy and tender with an agreeable flavor of acidity and sweetness; strong grower; bears well every year. November to March.

Jonathan—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. November to April.

King—(King of Tompkins Co.) One of the largest red winter apples. It is of extraordinary size, beautiful in color, attractive, and always brings the highest market price. Its size, beauty and good flavor make it in great demand. November to March.

Mammoth Black Twig—The tree is a strong grower, a regular and abundant bearer. A good winter apple. Deep red; sub-acid, very high flavored. Keeps until late spring.

Cortland—(New variety developed by New York State Experimental Station). For full description of Cortland, see Page 14. See illustration on back cover.

Reliable and dependable—in business 50 years.
McIntosh Red—Medium size, nearly covered with dark red. Flesh white, fine, very tender, juicy and refreshing, with attractive quince-like flavor. A good annual bearer. A very hardy variety, fruit of which is very attractive in appearance, of deep red color, good size, the flesh very tender and delicious. It is especially desirable for fancy trade. It comes into bearing young, yielding large crops of good fruit almost annually.

Northern Spy—This variety ranks about third in commercial importance with the fruit growers of Pennsylvania, New York and Ohio, being surpassed by Baldwin and R. I. Greening. Fruit is large and very attractive, being of bright red color with a delicious bloom; flesh is very juicy, crisp, tender and excellent for dessert or culinary purposes. Its fine reputation brings high prices in the market and the fruit is always in demand. The fruit is ready for use in November or December; keeps well in cold storage until April, or if more carefully handled, until May.

Northwestern Greening—Tree a splendid, vigorous grower, quite hardy. Fruit large to very large; green, becoming yellowish green when ripe; flesh yellow, fine grained and firm; flavor a good sub-acid; very smooth and attractive; should be given plenty of room in the orchard to secure large, even fruit. Keeps until March.

Old Winesap—Winter. Fine keeper; medium size, oblong, smooth, and a fine dark red; flesh yellow, crisp, tender, very juicy, aromatic, firm and good. Tree a strong grower, root-growth exceptionally strong; it comes into bearing early and is remarkable for its regular and abundant crops. One of the very best sorts for lower elevations anywhere south of Pennsylvania, from tide-water to 1,000 feet in Maryland, and to corresponding elevations south of Maryland. One of the sorts you must not overlook for these sections. When grown properly and packed in an attractive manner, it brings the highest prices in the fancy market.

Opalescent—Probably the handsomest apple ever put on the market. It is large and shapely and a veritable feast to the eye. Color light, shading to very dark crimson; skin smooth; susceptible of a very high polish, reflecting objects like a mirror; flesh yellowish, tender, juicy and good. December to March.

Rambo—Medium, flat, streaked red and yellow; very tender, juicy and fine flavored. Tree an upright grower, hardy and productive. October to December.
Apples—Winter Varieties (Continued)

Rhode Island Greening—This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and an abundant yielder. March to April.

Spitzenburg—(Esopus). Medium to large; deep red, high flavored; valuable for commercial purposes. November to April.

Stark—Fruit fair, smooth, uniform and attractive. Large, striped, mild, sub-acid. Valuable as a keeper. A good variety for the commercial orchard because the tree is thrifty, hardy, healthy, a reliable cropper and very productive. January to May.

Lobo—Comes into bearing early, is very productive and hangs well to the tree. The fruit is above medium in size, of bright crimson color, fine grained, tender, juicy flesh and of excellent flavor and quality. Ripens in October and keeps in cold storage until February. Highly recommended by the New Jersey Experimental Station.

Prices: 2 year trees, 4 to 5 ft. high, $1.00 each; 3 to 4 ft. high, 75c. each.

BARGAIN COLLECTION NO. 2

6 Splendid 4 to 5 ft. Apple Trees
1 Cortland 1 Early McIntosh
1 McIntosh 1 Grimes Golden
1 Delicious 1 Red Astrachan

ALL FOR $2.95

Rome Beauty—Keeps in good condition till May and June. Large, round, mottled and striped in different shades of red; flavor and quality away above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation to real merit, Rome Beauty is a variety Eastern orchardists should plant largely. Good grower, blooms late, bears heavily every year, is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York and West Virginia will make more money than some of the sorts which are now a large part of the total number of trees in commercial orchards.

Smokehouse—A very pleasant flavored dessert apple. Tree a vigorous grower; healthy, hardy and reliable cropper. Fruit of medium to large, uniform size and shape. Color yellow or greenish mottled with rather dark red, sometimes deepening to a solid bright red. October to March.

Do not overlook our special discount for early orders.
Apples—Winter Varieties (Continued)

Stayman's Winesap—Tree vigorous, hardy, spreading. An early bearer and very productive; fruit medium size, round, approaching conic, skin smooth, greenish yellow, splashed and striped with red and purple; flesh yellow, firm, tender, juicy, rich, sub-acid, aromatic, quality best. Splendid late keeper.

Tolman Sweet—Medium, pale yellow, slightly tinged with red; firm, rich and very sweet; the most valuable baking apple, vigorous, hardy and productive. Keeps until April.

Twenty Ounce—Very large, yellow striped, red, fine quality apple; good keeper. Tree vigorous grower, productive. October to January.

Wagener—(Red Winter Apple) Wagener is one of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. December to May.

Winter Banana—An excellent variety, which has stood the severest tests. Tree is hardy and will succeed in very cold climates; its wonderful productiveness will bring quicker and larger returns than any other apple in the orchard. The fruit has a richness of flavor that cannot be described. Flesh golden yellow, fine grained.

Wolf River—Fruit is very large, some specimens weighing 27 ounces, flattened, conical, highly colored. An excellent cooking apple. September to December.

Yellow Belleflower—Season, winter. A hardy apple of large size, a beautiful golden color, often with red blush; conical in shape.

York Imperial—This is a fine, hardy, large red, winter apple. It succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. Good shipper, bringing highest prices.

Certified Apple Trees

Read the letter on the opposite page. It means that we have continued for 1930 the Certification of fruit trees, a procedure that we established here years ago. This is an additional safeguard for the purchaser of fruit trees.

We have to offer thousands of apple trees that have been examined and Certified to be True to Name by Dr. J. K. Shaw, of the Massachusetts State Experiment Station, Amherst, Mass., who is recognized as an authority on fruit growing throughout the United States.

To each tree so Certified an official tag is permanently affixed to the tree, to stay there until the tree bears fruit True to Name, as guaranteed by us. The tag bears on its face the name of the variety of fruit the tree is Certified to bear, and on the reverse side the stamp of the Massachusetts Fruit Grower's Association.

This Certification of fruit trees is a comparatively new proposition, and we are the first large nursery in the United States to co-operate with the Massachusetts Fruit Growers' Association in the work.

Owing to the expense involved and lack of time, it was impossible to have all of our apple trees Certified, but as some of our customers may prefer Certified trees, we are offering them in the varieties noted in the letter on the opposite page.

We quote what the editor of one of the leading farm papers wrote us when he learned about the Apple Tree Certification proposition: "It is not necessary in your particular case that your trees be Certified, as your reputation for supplying only trees strictly True to Name to your customers is second to none; and if every nursery had the good record of Kelly Brothers in the matter of furnishing trees True to Name the Certification of trees would not amount to so much."

Our apple trees that are not Certified carry the same guarantee as those that are Certified, but if you should prefer Certified trees, so specify on your order. Do not order any varieties in the Certified stock except those noted.

Owing to the cost of the work of Certification, it is necessary for us to charge a slight advance for the Certified trees over our regular prices for apple trees. Our prices for apple trees which are not Certified are quoted on page 6 of this catalog, and we quote the following prices on Certified trees.

TO FRUIT GROWERS:

Several thousand one and two-year-old Apple trees were certified as true to name during the Summer of 1929, by this Association for Kelly Brothers Nurseries of Dansville, N.Y. This certification was in charge of Dr. J. K. Shaw of the Massachusetts Experiment Station, our agent for certification.

This does not mean that other trees sold by this nursery are misnamed nor that the trees are guaranteed in any way by this Association. It does mean that each certified tree has been carefully examined and pronounced true to name by a disinterested expert and that the danger of mixing varieties has practically been eliminated.

A printed label is attached to each and every certified tree bearing the name of the variety and our stamp of certification as being true to name.

Trees of the following varieties were certified in 1929 for Kelly Brothers Nurseries of Dansville, N.Y.

The Cortland Apple

A New Apple of Exceptional Merit

Origin of Cortland Apple

Thirty-two years ago at the New York Agricultural Experiment Station, Geneva, New York, flower buds of Ben Davis were hand pollinated with pollen from McIntosh blossoms. That was in 1898, and during the winter of 1899 eleven seeds obtained from the resulting fruit germinated and grew into trees large enough to set in the nursery that spring. In due time these young seedlings were moved to the orchard and there first bore fruit in 1911, although fruit from the budded stock had been obtained five years before. All but three of the original seedlings were quickly discarded. The seedling that was later to be called Cortland was propagated by budding to increase the supply of stock and was named Cortland, and sent out for trial in all parts of the country in 1915.

Possesses Desirable Characteristics of Both Parents

Cortland more nearly combines the good qualities and eliminates the weakness of both parents than had even been hoped for by those responsible for this remarkable variety. From the Ben Davis side of the family it derives one of its most notable and valuable characteristics, namely its ability to hang to the tree. To the credit of Ben Davis must also be entered its ability to stand handling. Those who grow Cortland testify that it handles as well as Baldwin. For its high quality Cortland must look to the McIntosh side of the house. The taste can hardly be distinguished from that of McIntosh, but is even richer if that be possible.

Hangs Well to Tree

A prominent fruit grower writes in The Rural New Yorker as follows: "I visited the Cortland and McIntosh orchard of Mr. William Hotaling on September sixth and he was picking his McIntosh. Exactly four weeks later we were again in the vicinity, and this time the Cortland Apples were just ready to pick. The Cortland Apples were hanging tenaciously to the trees. Under one tree that was carrying between three and four bushels of fruit were lying five or six apples, while other varieties nearby were dropping badly, due to the twenty-mile wind that was whipping through the orchard. The few Cortland Apples that were on the ground had the stems torn out. In other words, the Cortlands that had dropped had been literally torn from the trees by the whipping of the wind."

Our Cortland Trees Budded Direct from Bearing Orchards

Several years ago we decided to propagate this valuable new variety in our nurseries. We were able to secure buds direct from the bearing orchards of Mr. William Hotaling of Kinderhook, N. Y., and Mr. William Hart of Poughkeepsie, N. Y., two of the leading fruit growers in the Hudson Valley. The original trees in the orchards of both Mr. Hotaling and Mr. Hart were secured through the New York State Agricultural Experiment Station and have already borne several good crops of genuine Cortland fruit. We guarantee our Cortland to be absolutely True to Name, as we do all of our other stock. Our Cortland trees are propagated on the best French Seedlings, which insures the very finest root system, trees that will transplant without loss and give most satisfactory results.

See illustration of Cortland on back cover.
**Dwarf Apple Trees**

The Dwarf Apple trees come into bearing much earlier than the Standard trees. Their low, broad heads are within reach, so that the fruit can be easily picked. These trees take up so little room that they can be planted in the garden, or even on the lawn, and with care will bear good crops within three or four years. The fruit is of extra high quality. Trees bear very early.

We have the following list of best varieties of Dwarf Apples to offer:

- Baldwin
- Delicious
- Grimes Golden
- King
- McIntosh
- Nor. Spy
- Pound Sweet
- Red Astra-chan
- Rome Beauty
- R. I. Greening
- Stayman’s Wine-sap
- Sweet Bough
- Wealthy
- Winter Banana
- Yellow Transparent

**Crab Apples**

Besides producing much sought after fruit the Crab Apple tree is excellent for ornamental purposes. It will grow in any kind of soil and will bear every year. The Crab Apple is a prime favorite with the housewife for jellies and preserves. We have the following varieties at the same price as the standard apples:

- **Hyslop**—Almost as large as Early Strawberry Apple; deep crimson; very popular on account of its large size, beauty and hardiness. Keeps well into the winter.
- **Transcendent**—The best of all Crab Apples; good size, skin yellow striped with red—fine for preserves and jellies. Tree vigorous grower. Ripens in September.
- **Whitney**—Large, averaging 1 1/2 to 2 inches in diameter; skin smooth, glossy green, striped, splashed with carmine; flesh firm, juicy and rich. Vigorous, handsome.
Quince Trees

Its pre-eminence as a fruit for jellies and preserves makes the quince a profitable tree for the fruit grower, the farmer, or any one having even a small garden. The quince tree does not take much room on account of its dwarfish character. Any kind of good, rich oil will give good results. It can be grown in bush or tree form. Hardly any family’s fruit supply for the winter is complete without the quince. We recommend the following varieties:

Bourgeat—Bears at an early age, producing large crops of exceedingly large and handsome fruit, of a rich golden color. While it ripens soon after the Orange it keeps until mid-winter, or it is ready to use at once on maturity. It has proved to be free from leaf blight, the leaves keeping green until killed by frost.

Champion—Fruit very large, fair and handsome. Tree very handsome, surpassing other varieties in this respect, bears abundantly while young; flesh cooks as tender as an apple and without hard spots and cores; flavor delicate, imparting an exquisite quince taste and odor to any fruit with which it is cooked.

Meech’s Prolific—The most prolific of all known varieties; ripens between the Orange and Champion. Bears very early, usually a full crop at three years; quality unsurpassed and size large.

Orange—Popular, extensively cultivated, reliable and satisfactory. The name was given in an attempt to do justice to its most delicious flavor. Roundish, bright golden yellow, very large, fine grained; fine quality best for cooking. Firm, will stand shipping.

Rea’s Mammoth—Large, rich golden yellow; flesh cooks as tender as the apple and without hard spots or cores; flavor delicate, imparting an exquisite quince taste and odor to any fruit with which it is cooked. Sure to ripen even in Northern latitude. Very hardy and productive. We regard it the best of all quinces. October.

Wayne County Orange Quince

A beautiful bright golden yellow variety, large, fine grained and always round in shape. Fully \( \frac{3}{4} \) to \( \frac{3}{4} \) larger than any other variety. Delicious flavor and ripens from Sept. 1st to 15th. This Quince was first developed on the farm of Mr. Fred Grover at Pulneyville, Wayne County, New York, and for over 30 years this orchard yielded full size crops yearly. The Kelly Organization carefully investigated for three successive years the possibility of the new Quince and today we are offering this wonderful Quince, properly labeled “Wayne County Orange Quince.” Prices as above.

You eliminate risk when you buy from an old established firm.
**Apricots**

**This** is a rich, delicious fruit, coming between cherries and peaches. It is very much like the peach in outward appearance, but like the plum in quality and texture. The apricot ripens a month or more before the best early peaches come in, which explains the reason for the great demand and prevailing high prices. It should be planted in deep, rich soil; and care should be taken to know that the sub-soil as well as the top-soil is dry.

**Alexander**—Fruit yellow, flecked with red, very beautiful and delicious. July.

**Alexis**—Very hardy; an abundant bearer; yellow, with red cheek; large; slightly acid, rich and luscious.

**Budd**—Medium to large; light orange with blush on sunny side; flesh sweet, juicy, with flavor of the peach; hardy and productive.

**Gibb**—Tree hardy, grows symmetrical, productive. Fruit medium yellowish, sub-acid, juicy and rich. The best early variety, ripening soon after strawberries.

**Harris**—A hardy English sort. Medium size; oblong, orange; good quality; very early. The best variety for Eastern culture.

**Moorpark**—One of the largest, orange with red cheek; firm, juicy, with a rich flavor; very productive. August.

---

**Nut Trees**

**Make Waste Land Pay**

**Nut** trees will grow on waste barren land not suited to any other crop and in many cases pay better than farm crops or fruits. At the same time the trees are growing into valuable timber, a good investment in itself.

**Black Walnut**—This species is a common and stately forest tree in the Middle and Western states; grows from forty to sixty feet high; has an open, spreading head and is rapid in growth; produces large crops of nuts with rough, hard shell containing rich, oily kernels of fine flavor. **Trees 5 to 6 ft., 90c each; 4 to 5 ft., 70c each.**

**Butternut**—A fine native tree producing a large, longish nut, which is prized for its sweet, oily, nutritious kernel. **Price of Butternut trees, 4 to 5 ft., 75c each.**

**English Walnut**—A fine, lofty-growing tree, with handsome spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. **Trees 3 to 4 ft., $1.50 each.**

Peach Trees

Bring quick and sure returns

FOR many years it was the popular opinion that peaches would thrive in only certain sections of the country. We know better now. With one or two exceptions it has been shown that this fruit can be grown at a good profit in every state in the Union. Peaches can be grown on any soil that will produce the average yield of farm crops and are especially adapted to the lighter soils. Careful cultivation and intelligent pruning will work wonders in the production of peaches. If properly cared for, the trees are sure to bring in a handsome return on your investment. As in other fruits it is imperative, however, that your trees are of the best stock. It is very important that wood growth on peach trees is well ripened and that they have a good and sufficient quality of fibrous roots, so they will withstand the hot sun and drought that may occur after planting. We have a very good stock of hardy trees, with well ripened wood and an excellent root system, and we make the lowest possible price consistent with the quality of the stock.

Belle of Georgia—First half of August. Fruit very large and most attractive in color and shape, with a light red cheek; flesh white, firm, delicious—in all ways the quality is fine. Trees grow quick in shapely form and are very strong. Hardy, prolific.

Carman—Middle to end of July. Fruit large and broad, oval shaped, yellowish white; flesh creamy white with red tinge, flavor spicy and good. Especially suited to low, wet land, where other sorts will not thrive. Very hardy, and productive every year. A good shipper, quite satisfactory in commercial orchards.

Chair’s Choice—Deep yellow, red cheek; firm; a few days earlier than Smoek.

Champion—First of August. Fruit large, creamy white, with red cheek; sweet, juicy, very high quality, and splendid. Good shipper. Its fault, if anything, is that it is too tender. Hardy and productive.

Crawford’s Early—A large, yellow peach of splendid quality; strong grower and prolific fruiter. No other variety has been so extensively planted. First of September.

Crawford’s Late—Superb yellow peach of large size and excellent quality; great bearer. One of the finest late varieties. Last of September.

Elberta

The Money Maker

THE leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore, a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow, free stone. Season medium early, following quick upon Early Crawford. Early September.

See Front Covers for illustration in Natural Colors

Plant Elberta for Profit.
Peach Trees (Continued)

Fitzgerald—Originated in Canada. Fully equal to Crawford’s Early in size, quality and color, with a much smaller pit; a very early bearer, often when two years from bud; extra hardy, succeeding in Canada and in Michigan perfectly; fruit large, brilliant yellow with red cheek; ripens after Crawford’s Early.

Gold Drop—Large, good quality, hardy; a profitable market sort; follows Late Crawford.

Greensboro—Large, beautifully colored, bright red over yellow; flesh white; good quality, good commercial sort. July.

Hale—A description will hardly do justice to this fine variety. In size it is one-third to one-half larger than the Elberta and is more highly colored. The skin is deep crimson, smooth, tight, and without fuzz. Flesh is golden yellow, firm, and has a most delicious flavor. The pit separates easily from the flesh. It is exceptionally valuable as a commercial peach owing to its unusual keeping and shipping qualities. Will ship nearly as well as an apple. Fruit ripens about five days before Elberta, but it will hang on the tree longer. Your collection is incomplete without this variety.

Hiley (Hiley Belle)—Is a large, smooth, white peach with a bright red cheek on the sunny side. Resembles Belle of Georgia but is more highly colored. Flesh white with red streaks, fine rich and juicy. Hiley is of great value as an extremely hardy peach, of best quality, a long keeper, a good shipper, and one which comes at a season when a reliable known peach of good size is necessary to complete the succession of ripening in the modern commercial orchard. August.

Ray—Of good size and has a most attractive red blush of delicate shade. Flesh white, firm and of most excellent quality. Keeps well. A good shipper of fine appearance even after much handling. Trees strong growers, shapely and symmetrical. Old peach orchardists would be surprised to see how quickly they attain good size. A regular bearer of big crops. Ripens August 10th to 25th.

Peach Trees
(Continued)

with a most attractive red blush; juicy and delicious and keeps well; an excellent shipper. Its greater sweetness over other peaches requires only half the usual quantity of sugar in canning. The tree is a strong grower; early and regular bearer of big crops, and absolutely hardy; two weeks ahead of Early Crawford—maturing when highest market price prevails. Market men seek the Rochester peach not only for its large size and beauty, but for the further reason that it is a good shipper.

Salway—Large; deep yellow, red cheek. Flesh yellow, juicy. October.

Smock (Beer’s Smock)—This is an old standard variety, highly prized and valuable for either home use or market. It has a beautiful yellow color, and the flesh is firm, juicy and of high flavor. It is a free-stone; ripens very late. Tree is a fine grower and productive. September.

Yellow St. John—Of medium size, orange yellow with a red blush on sunny side; flesh tender, juicy and quality very good. Tree is a strong grower and bears heavy crops every season. Reaches the market at a time when the demand for early fruit is at its height. When properly handled, the best prices can be obtained. Middle August.
The value of this fruit is just beginning to be appreciated and its cultivation is extending. Compared with apples, there are few really fine pears on the market. If growers would specialize in this fruit they would be well repaid for their efforts, as high prices are always obtainable for choice pears. Our pears are all budded on imported French stock, which gives them the finest root system. We recommend the following varieties:

Anjou—This is one of the best known, most popular and profitable late pears. The tree is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thoroughly ripe. They are very juicy and luscious and of the best quality. For late fall and very early winter use, we have no better variety. October to January.

Beurre Bosc—Greatly esteemed. A large yellow pear; flesh white, rich and delicious; has long stem which allows it to sway in heavy winds without dropping. The tree is a slow grower, but most productive. Keeps until Christmas.

Clapp’s Favorite—Large, fine; pale, lemon-yellow, with brown dots; fine texture, melting, buttery, juicy, with a rich, sweet, delicate, vinous flavor. Tree hardy and very productive. Thrives where other varieties fail.

Duchess D’Angouleme—A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all round profitable market pear. October to November.

Flemish Beauty—This fine old pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. September and October.

BARTLETT—The Best Commercial Pear

Without question the most profitable Pear in existence. Not only the most popular Pear for the market but for home use as well, a leader among canning Pears, always commands top prices on the market. Bartlett Pears brought a big price on the market this year. Under intelligent management commercial Pear orchards bring big returns. Far sighted fruit growers will plant Bartlett Pear orchards this year.

The fruit is large, golden yellow in color with a reddish blush on the sunny side. The flesh is tender, melting and juicy, with a delicious musky flavor. The tree is a vigorous, erect grower and bears abundantly. Ripens in September.

When planting orchards of Standard Bartlett trees, it is recommended that Dwarf Pear trees be planted as fillers.

We have this year the finest lot of Bartlett trees in both Standard and Dwarfs that we have ever grown. Take advantage of our exceptionally low prices by ordering at once.

Our prices on Bartlett standard pear trees are 10c per tree lower than the price of other varieties given below. This applies to all sizes and to the each, ten and hundred rates.

Bartlett 10 cents per tree less than above prices. This applies to all sizes and to each, ten and hundred rates.

See color illustration of Bartlett on back cover.
Pear Trees (Continued)

Kieffer—Large to very large, skin yellow, with a light vermilion cheek; flesh brittle, very juicy, with a marked musky aroma; good quality. It is unfortunate that the merits of this fruit have been underestimated from the haste in which it is hurried to market in an immature condition, and often before it has attained the proper size. When allowed to hang upon the trees until the beginning of October, and then carefully ripened in a cool, dark room, there are few pears which are more attractive. Combines extreme juiciness with a sprightly sub-acid flavor and the peculiar aroma of Bartlett. Fruit should be thinned. 90 per cent Kieffer and 10 per cent Le Conte should always be the arrangement, on account of pollinizing.

Lawrence—Trees healthy, hardy and very productive. Fruit large; skin yellow, covered with brown spots. Flesh whitish, rich, buttery, and aromatic. One of the quality pears that has great merit for commercial orchards.

Le Conte—Undoubtedly another hybrid from the Chinese Sand Pear. Large, pyriform; smooth, pale yellow, quality good, juicy and pleasant. Tree remarkably vigorous, healthy and free from blight. A prolific bearer and profitable. October.

Seckel—A beautiful and delicious little pear that is the standard of excellence in its class. One of the richest and highest flavored pears known, always in demand for desserts and luncheons and better known than any pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October. 

Louise Bonne de Jersey—Large size, pale green in the shade but overspread with brownish red in the sun; very juicy and melting with a rich and excellent flavor. Good commercial sort. September to October.

Sheldon—A large, round, russet and red pear of very rich, fine quality, melting and delicious. Tree vigorous, bears well. October.

Vermont Beauty—Of medium size, roundish, yellow, heavily shaded with carmine; flesh exceedingly fine, sweet and juicy. The tree makes a strong, healthy growth and bears good crops. October.

Wilder—Medium to small, greenish yellow with brownish red cheek; melting, sweet and very pleasant; vigorous grower; good bearer.

Worden-Seckel—This beautiful and delicious pear attracted wide attention when introduced recently. In quality it is rated very high. In size it is much larger than Seckel. It is shaped like Bartlett but is not as large. A tree of this beautiful pear is an object of beauty on the home ground when laden with beautiful specimens. October.

Kelly's trees are grown on finest French whole root seedlings.
Dwarf Pear Trees

Require Little Room - Fruit Easily Picked - Bear Young

Although Dwarf Pear Trees have proven very profitable in commercial orchards, they are best adapted to the garden or home orchard where the space is limited, as they can be planted very close together and require little room.

The fruit is very easy to pick as the trees are low headed and it is not necessary to wait long for returns as they come into bearing very early, usually the second or third year after planting.

Pears are dwarfed by budding on Quince Stock and the trees should be planted three inches below the union.

Kelly Bros. Nurseries, Dansville, N.Y.

April 29, 1929.

Gentlemen:

I received my nursery stock and it is very satisfactory. It is the best stock I ever got for the price. Thank you for it.

Yours truly,
MARK SHEVCHENKO

Our Nurseries Absolutely Free From San Jose Scale

It is an established fact that San Jose scale has never been found in our nurseries. We have here three resident New York State Inspectors who look after our stock from seedling to freight car, and not once has this worst of insect pests made its appearance in our nurseries. We welcome the visits of the inspectors, because we know this helps to keep our stock free from disease. Ours is the only nursery center of any importance in the United States that is absolutely free from San Jose scale.

See page 24 for illustration of one of Kelly’s Dwarf Bartlett pears in bearing the year after planting.
Dwarf Fruit Trees Bring Quick Returns
Often Bear Year After Planting

Although there are hundreds of profitable commercial orchards of dwarf apples, dwarf pears and quinces throughout the country, dwarf trees adapt themselves best to the home orchard and garden, where space is limited and ease in picking is an important item.

Dwarf Trees Best For Home Orchard

If you have a small plot of land that is not being put to any other use plant a home orchard of dwarf apples, pears and quinces. On account of their dwarfish nature these trees can be planted ten feet apart each way. It will not take a great deal of room to provide your family with an abundance of health giving fruit from early fall until late winter. If you haven't room for a home orchard then plant a hedge of dwarf trees across your garden. In a dwarf hedge of this nature the trees can be planted as close as six feet apart. Of course the branches will interlace a little when the trees reach maturity but this will not do any harm. You will find such a hedge an object of beauty when in bloom and a source of pleasure and profit when in fruit.

Fruit Easy To Pick From Dwarf Trees

On account of the low growing habit of dwarf trees you will find it very easy to pick the fruit. Practically all of the limbs can be reached from the ground. In any event, the most you will need will be a step ladder. Ease in picking is an important item especially during the busy harvest days.

Dwarf Trees Bear When Very Young

As the illustration and letter at the bottom of this page will testify you will not have to wait long for fruit from dwarf trees. Dwarf trees often bear the year after planting—in fact, it is quite a common occurrence to have fruit on dwarf trees in the nursery row, even before the trees are set out in their permanent locations.

Fruit On Dwarf Trees Larger Than On Standards

The fruit produced by dwarf trees is the same color and quality as that produced by standard trees but will average larger in size. In fact many authorities claim that fruit from dwarf trees is not only larger but of better quality.

Planted a Little Over a Year and Bore Fruit

R. 6, Butler, Pa.

Kelly Bros., Dansville, N. Y.

Gentlemen: I enclose a photo of one of twelve Dwarf Bartlett Pear Trees bought from you and planted last spring. This tree has been visited by dozens and dozens of people and all said they never saw anything like it. I should have a yard stick in the picture as the height of the tree to where this year's growth began is only 34 inches.

Yours truly,

J. C. HOCH
Cherry Trees

In these days of apparent specialized fruit growing, cherries seem to have been neglected. Yet it is safe to say that no fruit will find a more ready market or bring in a larger return on the money invested. Cherry trees can be used for ornamental as well as productive purposes and increases their possibilities on the market. Any well-drained soil will be found to be adapted to the sturdy growth of cherry trees. Our cherries are all budded on imported French stocks and these form a fibrous root which reduces considerably the loss in planting. We believe that no fruit will bring greater profits, as the cherry will bear a fair crop two or three years after planting and requires very little care and attention. We especially recommend the Large Montmorency for commercial planting, as it bears enormous crops and the canning factories pay a higher price for it than they do for any other sour variety.

Sweet Cherries

**Black Tartarian**—Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. June.

**Bing**—One of the most delicious sweet cherries grown. Tree very hardy and vigorous, with heavy foliage. It succeeds in the East better than most sweet varieties. Fruit is large, dark brown or black and very fine quality. Bing is a good shipper and should be planted with Lambert for commercial purposes.

**Governor Wood**—Large, heart-shaped; light yellow, marbled light red, juicy, sweet and rich. Tree vigorous, productive; forms a round head. An old variety that is still a favorite in many regions.

**Lambert**—One of the largest of all cherries. It is purple-red; firm and rich. Every year sees an enormous crop, and the tree not only grows well, but is proof against insect and fungous attacks. The finest of shippers.

**Napoleon or Royal Ann**—A beautiful cherry of large size; pale yellow with bright red cheek; flesh firm, juicy and sweet; one of the best for market and canning.

**Schmidt’s Bigarreau**—The fruit is very large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine rich flavor. Fruit grows in clusters. It is an excellent shipper. July.

**Windsor**—Tree upright, vigorous and a rapid grower; fruit large, roundish, oblong; very firm and juicy; flesh pinkish and sometimes streaked; quality very good; a productive bearer; has attracted attention owing to its large size and dark color; almost black. July.

**Yellow Spanish**—A pale yellow cherry with bright red cheek in the sun. It is one of the best, most beautiful and popular of all the light colored cherries; vigorous and productive.

Kelly’s trees are grown on finest French whole root seedlings.
Sour Cherries

**Dychouse**—A hardy and valuable cherry. Unquestionably the earliest cherry, ten days earlier than Richmond, fine quality, its early bearing remarkable as its great hardiness. Has the appearance of being covered with a scarlet cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known; a splendid keeper and free from knots. For tarts, pies and especially for canning, it has no superiors among cherries. June.

**Early Richmond**—One of the most valuable and popular cherries, unsurpassed for cooking purposes. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish, spreading head, exceedingly productive. Ripens through June. The cherry tree bears almost every year.

**English Morello**—Fruit large, elongated; almost blackish red when fully ripe; very rich, acid; juicy and good. A splendid pie cherry. Tree very hardy, somewhat smaller than other sorts, but exceedingly productive. This fruit is in great demand by the fruit-juice manufacturers. July.

**Large Montmorency**—This is the best of all the sour varieties of cherries. There is a greater demand on the market for this cherry than for any other. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of the best fruit of all other sour varieties. No matter how unfavorable the season may be, Montmorency can be depended upon for a full crop. The Montmorency is a good shipper, very attractive looking and always brings good prices. The canning factories are always calling for them and want them by the hundreds of tons. The fruit is good-sized, fine flavored and bright, clear red. Fruit ripens 10 days after Early Richmond.

**May Duke**—This is one of the good old standbys which has been so popular for many years in the past, both in the East and West, where it has been largely planted and where it has rewarded the planter by large crops of profitable fruit. The color of this cherry gradually changes from a bright red to nearly black when fully ripe. The flesh is red, becoming dark purple later; very juicy and melting, rich, acid and of superior quality. It must remain on the tree until fully ripe in order to develop its best character. Season very early. The tree is very hardy and adapted to all localities.

**Olivet**—A tree of this variety should be in every garden. The fruit is very large, has a shining deep red color; tender, mild sub-acid flavor. Ripens in June.

**Ostheime**—Large; skin red, dark at maturity; flesh liver-colored; tender, juicy, almost sweet; very good; hardy.

**Wragg**—Large, roundish, heart-shaped, dark crimson and when fully ripe, black or nearly so; flesh and juice light crimson, firm and good, very productive; one of the hardiest and is usually a sure cropper.

*You get more for your money when you buy from Kelly.*
Plum Trees

No other fruit tree, unless it is the cherry will produce more abundantly than a plum tree. Although they will yield crop after crop despite neglect, plum trees will readily show the result of care and modern methods of fruit growing. The commercial side of plum production has received much attention in late years, but the supply still falls short of the demand. In general, plum trees thrive best in a sandy or clayey soil. A distance of 16 to 18 feet apart is considered the best for plum trees with the distance increased to 20 feet where a wagon spraying outfit is used. Many varieties of plums produce so abundantly that the best results will be obtainable only by careful thinning. If allowed to grow naturally the trees will be weakened and the quality of the fruit will be inferior. We can recommend to the planter the following varieties:

---

**EUROPEAN PLUMS**

**Bradshaw**—A very large and fine early plum, dark violet red, juicy and good. Trees erect and vigorous; very productive; valuable for market. The quality is excellent, and it is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety.

**Fellumberland Prune**—Dark purple with a dark blue bloom; size medium; oval, pointed and tapering. Flesh juicy and delicious; fine for drying.

**German Prune**—A valuable plum for dessert, but most esteemed for market and drying or preserving. Fruit long, oval, purple with a thick bloom; flesh firm, sweet and pleasant, separating freely from the stone; moderate growth. A great favorite. A sure market for all you have to sell at very profitable prices.

**Geuill**—Very large, bluish purple; flesh yellowish green, sweet. Tree hardy and rapid grower.

**Grand Duke**—One of the best late plums for market; as large as Bradshaw, of same color, entirely free from rot. Last of September.

**Imperial Gage**—Rather large; oval, greenish; flesh juicy, rich and delicious, parts from the stone. Tree a vigorous grower; very productive and one of the best plums.

**Lombard**—Medium to large, roundish, oval, dark red, flesh yellow, juicy and pleasant flavor; hardy, popular, nearly always producing a crop; a valuable commercial sort. August.

**Monarch**—Very large, brilliant; bluish purple; flesh pale golden green; juicy, abundant bearer and begins fruiting young. Free from rot; excellent for market. September.
Plums

European Varieties (Continued)

Reine Claude—Large, pale yellow, marked with red, excellent and of fine quality; good bearer; valuable for commercial purposes. Middle of September.

Shipper's Pride—Large and handsome, dark purple; quality fine, juicy and sweet; excellent for canning. September.

Shropshire Damson—One of the favorite Damsons. Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

York State Prune is one of the largest, best in quality and most productive of all prunes or plums. Size large; color dark blue, covered with purple blush; flesh yellow and delicious; freestone, ripening the last week in September. It originated in Dansville, N. Y.

JAPANESE PLUMS

Abundance—Fruit large, showy, beautiful; amber, turning to a rich, bright cherry color, with a decided white bloom, and highly perfumed. Flesh light yellow, exceedingly juicy and tender, of a delicious sweetness impossible to describe. Stone small and parts readily from flesh. For canning it is of greatest excellence. Its season is very early, ripening in advance of other plums, thus adding to its special value.

Burbank—When properly thinned, the fruit is very large, nearly round and bright; meaty and quite firm, keeping and shipping finely. Tree hardy and vigorous, but sprawling in growth; needs close pruning; enormously productive. See illustration on back cover.

Red June—The best Japan plum, ripening before Abundance. Medium to large; deep vermilion-red, with handsome bloom; flesh light lemon-yellow, firm; moderately juicy; fine quality. Tree upright, spreading, vigorous and hardy; productive.

Satsuma—Large, globular, with sharp point. Color purple and red with bloom; flesh firm, juicy, dark red or blood color, fine quality; pit very small.

Shiro—Medium size, yellow, and very sweet. The best quality of any of the Japan plums. We have fruited it in nursery rows and can recommend it highly for garden planting. September.

Wickson—A sturdy, upright grower; fruit remarkably handsome, deep, maroon-red, covered with white bloom; stone small; flesh fine texture, firm, sugary and delicious; excellent keeper and shipper.

Buy direct from our nursery and save money.
Special Bargains in Fruit Trees

Many planters prefer to plant the smaller size trees, as it reduces the cost of investment. In all cases they report success in planting this grade, as the fibers of the roots are small and readily adhere to the ground and make a rapid and very satisfactory growth the first year. A few buyers of fruit trees have an idea that the smaller trees are poor trees and are not fit to plant. This is a mistake, as each one of our smaller trees is a good, clean, straight, healthy little tree and is first class in every respect according to grade. These small trees are well rooted and mature, and we recommend them most highly to the planter. We have a good stock of apple, peach, pear, and offer them at these special low prices:

"TRUE TO NAME"
Rushville, N. Y.,
Dec. 17th, 1927
Kelly Bros. Nurseries,
Dansville, N. Y.
Gentlemen:
I am going to write you in regard to trees we have purchased from your firm in the past.

Twelve years ago we set five acres of Apple trees, also a number of Plum trees. Every tree has borne fruit and is True to Name. The R. I. Greening, Baldwin, Rome Beauty and McIntosh began to bear several years ago and we have had more or less of a crop every year. This season we had the best crop of all, one row of thirteen McIntosh Trees netting us $225.00. We are sorry we did not have more of this variety.

We shall get more trees in the Spring and they surely will be Kelly trees.

Yours truly,
L. C. WILLIAMS

An Expression from our Home People:

We, the undersigned, wish to state that we have known the Kelly Brothers for many years and have watched the steady increase in their business until today they are one of the largest growers of fruit trees in the United States. We believe that their success is due to their thorough knowledge of the business and square dealing with their customers, and it is with pleasure that we recommend them to the planter and fruit grower.

Here are a very few of the many unsolicited letters we have received from our customers, testifying as to the quality of our stock, prompt attention in filling orders, and fair dealing. READ THEM:

Kelly's Trees Best Ever Purchased

West Cohocton, N. Y.
Kelly Brothers, D. S., Sept. 1, 1929.

Gentlemen:

Beg to say, I have been in the fruit game for forty years and the best trees I have purchased from any nursery during this time I have had from you last Spring.

They are standing the drought splendidly on account of their splendid root system. I haven't lost one of the number I bought while my neighbors are losing a great share of their last Spring's setting.

Gentlemen, this as you know is unsolicited, but I feel we should show our appreciation of a good square deal in these days, and help others buy good trees at a first class nursery.

Thanking you for the fine treatment and square dealing, I am,

Very truly yours,

P. V. B. VAN SLYKE,
Member Executive Com.,
New York State Agricultural Society.

Kelly Bros. Nurseries, Dansville, N. Y.

Siebert, Md., Nov. 13, 1929.

Gentlemen:

You sent me better trees than I ordered or expected. They are nice size with good thrifty roots for which please accept our thanks.

Yours truly,

F. ERNEST REID.

Kelly Bros., Dansville, N. Y.

Yorktown Hghts., N. Y.
April 19, 1929.

Gentlemen:

My trees arrived the 26th and in good condition, especially in regard to moisture. You have without doubt made several good boosting friends down this way.

The courtesy of a shipping notice card was especially appreciated as we were able to get together rapidly when the trees arrived and give them immediate attention.

It sure leaves a good taste in the mouth to have dealings with you folks.

Yours truly,

JOHN K. RICHARDSON.

Kelly Bros. Nurseries, Dansville, N. Y.

Gloucester, Mass., June 3, 1929.

Gentlemen:

I received the shipment of trees and shrubs and immediately had them set out. I did not write before because I waited until every tree, shrub and rose bush had started to leaf out.

Indeed they are a handsome lot—100% grew and made such a vigorous growth that you can hardly realize how proud we are of them.

Sincerely yours,

MRS. BERNICE S. CURTIS.

Kelly Bros. Nurseries, Dansville, N. Y.

Gentlemen:

I was more pleased with your stock than any I have bought at other nurseries. The trees were packed well, had wonderful root systems; not one of them died in the rather dry place they are planted, as stock from other nurseries has done, and what we noticed especially about your trees is that they made twice or three times the growth during last Summer as trees I had set out in former years from other nurseries.

Yours very truly,

WILLIAM P. WOLCOTT.

Kelly Bros. Nurseries, Dansville, N. Y.

May 1st, 1929.

Gentlemen:

Very truly yours,

IRA H. WHITE.

Kelly Bros. Nurseries, Dansville, N. Y.

April 20, 1929.
Raspberries

A READY market can always be found for raspberries. When well cared for they are sure to return a good profit. A patch of raspberries should be renewed about once in five years, as by that time the quality of the berries deteriorates and the fruit becomes small. The plants should be well manured and cultivated at frequent intervals. We offer the following varieties:

**Columbian (Purple)**—A strong grower, unexcelled for productiveness and desirable for canning. Fruit very large, purplish color, rather soft; rich, sprightly flavor.

**Cumberland (Black)**—The largest of all blackcaps. A healthy, vigorous grower, throwing up stout, stocky, well-branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality good. Mid-season.

**Cuthbert (Red)**—Medium to large, crimson; hardy and prolific. The most reliable sort. Fine for market or garden. Succeeds well over a large range of territory both North and South. Sufficiently firm so that the fruit ships well and of such good quality as to make it one of the best for home use.

**Herbert (Red)**—Fruit is large, bright to deep red. It is a very strong grower and very productive. Canes strong and vigorous. Season begins a few days before Cuthbert.

**Kansas (Black)**—One of the best of the early ripening blackcaps; the berries are large and showy. Canes are of strong growth, very hardy and prolific, with tough, healthy, clean foliage.

**Loudon (Red)**—The Loudon new red raspberry ripens with the earliest and hangs late. Very productive and a good shipper.

**Marlboro (Red)**—A very profitable, early market variety with large, light crimson fruits, of good size and flavor. The crop covers a period of four or five weeks in ripening.

**St. Regis (Everbearing)**—A new acquisition to the red raspberry family. Fruit commences to ripen with the earliest and continues on young canes until October. Color bright crimson.

**Latham (Redpath)**—The new mosaic-free hardy Red Raspberry. Without question Latham is the most profitable Red Raspberry for commercial planting. It is absolutely hardy, having withstood the Winters of Manitoba, Canada, without protection. It cannot be surpassed in productiveness, out-yielding even Cuthbert. Due to its rich brilliant red color it sells readily on market stands, and in addition is a delightful table berry, and almost a perfect berry for canning. The berries are large, round and unusually firm, exceptionally well suited for shipping to distant markets. It ripens evenly over a very long season. You cannot afford to overlook this extremely profitable new red variety.

Blackberries

FRUIT growers as a rule regard the blackberry as the most profitable of the several varieties of berries. Blackberries thrive best on fertile loam, although clay and sandy soils also produce good results. The rows should be about six feet apart, with each plant approximately two feet apart in the row. We have selected the following varieties as the best:

Blackberries thrive best on fertile loam, although clay and sandy soils also produce good results. The rows should be about six feet apart, with each plant approximately two feet apart in the row. We have selected the following varieties as the best:

<table>
<thead>
<tr>
<th>Variety</th>
<th>Description</th>
<th>Ripening Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blower</td>
<td>An upright, mammoth grower; very hardy and enormously productive; large, glossy, firm and luscious berry, extra good everywhere. Fruit may be picked continuously from July to October, ripening in great quantities in August and in abundance in September.</td>
<td></td>
</tr>
<tr>
<td>Eldorado</td>
<td>The hardiest and sweetest blackberry. Very vigorous and hardy. Berries are very large, jet black, borne in large clusters and ripen well together; are very sweet, melting, pleasing to the taste, have no hard core, and keep eight to ten days.</td>
<td></td>
</tr>
<tr>
<td>Erie</td>
<td>Fruit very large, excellent quality. There is no other berry that rivals it in combining hardness, large size, earliness and productiveness.</td>
<td></td>
</tr>
<tr>
<td>Mersereau</td>
<td>Remarkably strong grower, upright, producing stout, stocky canes. An enormous producer of extra-size berries, which are brilliant black and retain their color; extra quality, sweet, rich and melting, without core. Ripens very early.</td>
<td></td>
</tr>
<tr>
<td>Rathbun</td>
<td>A strong, erect grower with strong stem, branching freely; will root from tip of branches like a raspberry. Hardy, having endured twenty degrees below zero and produced a good crop. Forms a neat, compact bush, four to five feet high, producing its immense fruit abundantly. Fruit is sweet and luscious without hard core, of extra high flavor, jet black, small seeds, firm enough to ship and handle well. Very large size.</td>
<td></td>
</tr>
<tr>
<td>Snyder</td>
<td>Abundant bearer; berries of medium size; fruit ripens early and is sweet and juicy. Canes very hardy even in extremely cold climates. You won't go wrong in planting this variety, as it will be found most satisfactory both as a home and market berry.</td>
<td></td>
</tr>
<tr>
<td>Wilson’s Early</td>

Special Collection Price $4.95

Remember that we guarantee satisfaction.
Strawberries

Being practically the first fruit of its kind on the market, strawberries are ready sellers and can be grown at a good profit. They will thrive in any good garden soil. Plants should be set one foot apart in the row, with the rows two feet apart. Beds should be renewed every third year, as it has been found that more than two crops to a planting are not profitable.

**PRICES OF ALL VARIETIES OF STRAWBERRIES**

**Fall-Bearing Strawberries**

<table>
<thead>
<tr>
<th>Twenty-five Hundred Thousand</th>
<th>$1.50</th>
<th>$4.50</th>
<th>$25.00</th>
</tr>
</thead>
</table>

**NOTE**—Strawberry plants are always shipped by express or parcel post separate from balance of order. About May 1st.

**Brandywine**—A good market berry; medium to large; dark scarlet, firm and somewhat acid; a good bearer and does well in clay soil.

**Corsican**—It is a great strawberry; it is the biggest berry; it is the brightest and best in color; it is a great yielder and producer; and the foliage is exceedingly vigorous and leathery, resisting fungus, drought, weed and even neglect of cultivation.

**Jessie**—Especially valuable for garden. Large, firm and solid; excellent quality; productive.

**Marshall**—Very large, dark crimson; firm and of excellent quality; plant vigorous and productive; one of the best varieties for home use or market.

**Sample**—Late, of large size and yields enormous quantities of high quality bright red berries. Standard shipping variety.

**Senator Dunlap**—A sturdy plant and heavy cropper of best quality berries, with clean, healthy foliage which has no tendency to rust. The berries are very large, roundish conical, regular with slight neck. In color, they are glossy crimson, with the meat firm and solid, deep crimson throughout and good in quality.

**Wilson**—The best berry for canning. This is an old well-thought-of variety that has always given satisfaction. One of the very best berries for flavor and quality. We recommend this variety to you.

**Productive**—This is the strongest growing plant of all the fall-bearing strawberries. It is a seedling of the Autumn and Pan-American. The plants are very large and heavy-rooted, producing a phenomenal crop of medium to large fruits. The young plants are produced in good quantities. This variety has very prominent seeds, is very firm and a good shipper.

**Superb**—The plants of the Superb are of good, average size, are strong growers and stand the winters best of all kinds tested. The fruit is very large, roundish, dark-colored, glossy, attractive and smooth. It has the finest flavor.

**Mastodon**—Without question the finest of the Fall or Everbearing varieties. It produces an immense crop in June and an abundant crop in the Fall. The most prolific of all the Fall varieties. Its berries are of immense size and of unusually good quality and color. The plants are healthy, very strong growers. An exceedingly profitable variety.

**Currants**

We have a large supply of extra nice 2 year old Wilder Currant Bushes. Write us for special low prices on large quantities for commercial planting.
Garden Roots

Asparagus Roots

Asparagus is one of the most profitable crops grown. It is in great demand in all markets, always selling for high prices. The demand is much greater than the supply, as asparagus has not been so extensively planted as many other farm products. It will thrive in all localities and on any soil that will produce general farm crops. To have it real early, it should be planted on light soil. The sprouts are not usually cut for the market until the second year after planting, except to mow down the canes in the fall or spring. Plant from 4 to 5 inches deep, covering with only 3 inches of soil at first, and cover the remainder as the plants grow. The rows should be 5 feet apart, with the plants set 2 feet apart in the row. Broadcast about 5 bushels of salt and 300 pounds of nitrate of soda to the acre in March and give it a good top dressing of stable manure in November. The profits from asparagus are wonderful. It is ready for market in April or May, and the income derived from it is especially appreciated at this time of the year. It is successfully planted during March, April and May.

Price, Strong, Healthy Two Year Old Roots
$1.00 per 25; $2.25 per 100; $15.00 per 1000

VARIETIES

Conover's Colossal—A standard variety of large size, tender and excellent quality. This variety is known everywhere. You will get good satisfaction out of a bed of asparagus.

Palmetto—A very early variety, even, regular size and of excellent quality. It has been tested both North and South and has proven entirely satisfactory.

Washington—New rust-resisting variety. Exceptionally rust resistant due to unusually vigorous constitution; extraordinary yielding qualities; large size of individual stalks and their rapid development to cutting size, which rapid growth stands for tenderness, are the outstanding characteristics of this new variety. The shoots are straight, of dark green color, with a heavy purple overtone. They are always tight and do not open until well above the ground.

Horseradish

Will stand a great deal of hardship and exist in soil year after year. Plant in deep, rich, cool soil. The yield will vary according to the soil and treatment.

Price, Strong Sets
50c per 10; $3.00 per 100; $15.00 per 1000

Rhubarb

(Pie Plant)

Rhubarb is the earliest available material in the spring for fresh pies and sauce. Every family should have a few rhubarb roots, for there is nothing in the fruit or vegetable line that is so beneficial to the human system in the spring months. Set plants 12 to 18 inches apart in rows.

Early Scarlet—Rather small, early and good.

Linnaeus—Large, early, tender and fine.

Prices, Strong, 2 Year Plants
20c each; $1.50 per 10; $10.00 per 100

You get the most for your money from Kelly.
Grapes

Because of their adaptability to fit any place where there is a bit of soil, grapes are often a source of considerable profit. In fact, some fruit growers say that if you can plant only one fruit, let that be grapes. They require little care, and as a rule will produce most abundantly. Rocky hillsides on which no other fruit would thrive will produce wonderful crops of grapes and show profits that will overshadow any other part of the farm. Good grapes command high prices and will find a ready market in any locality.

Agawam—Good red variety; flesh tender and juicy, good bearer. Ripens with Concord.

Brighton—A large, delicious, sweet red grape; vine thrifty and a strong grower; flesh sweet, tender and very juicy. Best of all large red grapes.

Campbell’s Early—Black, with purple bloom; bunch and berries large. Juicy, with rich, sweet flavor; almost seedless. Hardy and of vigorous growth. Fruit hangs on vines sound and perfect for ten weeks or more after ripening.

Catawba—Dark red when fully ripe. Bunch large, berries medium to large, skin thick, tough; flesh somewhat pulpy, with rich vinous flavor, of best quality for both table and wine.

Champion—This is an extra early black grape. Bunch medium to large and compact. Berries adhering to the stem better than many other varieties. Skin thick, flesh sweet, juicy, pulpy and good flavor. Vine a rank, vigorous grower.

You pay only one profit when you buy of Kelly.
Concord—The well-known black grape. Can always be depended on to fruit heavily. Succeeds over a large extent of country. Popular for market.

Delaware—One of the finest grapes. Bunches small, compact, shouldered; berries rather small, round; skin thin, light red; flesh juicy, with an exceedingly sweet and delicious flavor.

Diamond White—The leading early white grape. White, with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality; above medium size, adheres firmly to stem.

Moore's Early—Bunch and berry large, with a blue bloom; quality better than Concord. Its size and earliness render it desirable.

Niagara White—Popular everywhere. Bunch very large and handsome, often shouldered, compact; berries large, round; skin thin, tough, does not crack and carries well; has not much pulp when fully ripe, melting, sweet, with a flavor and aroma peculiarly its own, and agreeable to most tastes; ripens with Concord, sometimes a little earlier. Vine very vigorous and productive, succeeding well in all sections.

Pocklington—Berries large, golden yellow; sweet and tender with little pulp. Thoroughly hardy and healthy. Ripens after Concord.

Worden—Possesses most of the good qualities of Concord and lacks some of the bad ones. Differs chiefly in having larger berries and bunches. Better in quality and five to ten days earlier.

Kelly's Golden Anniversary Year Brings Bigger Values Than Ever.
Shade and Ornamental Trees Add Value as well as Beauty

American Elm—The most admired of all American trees. Very attractive in any suitable location, entirely hardy and easily transplanted. There are more elm trees planted along our streets than any other variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world. Price, 6 to 8 feet, $1.25 each, $10.00 per 10; 8 to 10 feet, $1.75 each, $15.00 per 10.

American Linden (Basswood)—A rapid-growing, large sized, beautiful native tree with large, shining cordate leaves, stately. Growing 60 to 80 feet tall. Its beautiful white flowers appear in July and yield a delicate perfume. Valuable for its beautiful white wood. Price, 6 to 8 feet, $2.25 each; 8 to 10 feet, $2.75 each.

Ash-Leaved Maple (Box Elder)—A fine, rapid-growing variety, with handsome, light green foliage and spreading head; very hardy; desirable for street planting and succeeds in many sections where other varieties do not thrive. Price, 6 to 8 feet, $1.00 each; 8 to 10 feet, $1.25 each.

Bechtel’s Flowering Crab—Makes a medium sized tree, perfectly hardy, succeeds well in all soils. When in bloom appears to be covered with delicate pink, double small roses of delicious fragrance. Price, 2 to 3 feet, $0.75 each, $6.50 per 10; 3 to 4 feet, $1.00 each, $8.50 per 10; 4 to 5 feet, $1.25 each, $10.00 per 10.

Increase the value of your home with a few well planted Ornamental trees.
Catalpa Bungeii (Umbrella Tree)—Grafted on stems 6 to 8 feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped, deep green, lying like shingles on a roof; always making a symmetrical head. One of the most unique trees; desirable for lawn, park and cemetery planting. Price, 6 to 8 feet, $1.75 each.

Catalpa Speciosa—One of the most rapid growers. Valuable for timber, fence posts, railroad ties, etc., possessing wonderful durability. Large, heart-shaped, downy leaves and compound panicles of white flowers, tinged with violet and dotted with purple and yellow. Very ornamental and useful. Price, 6 to 8 feet, 90c each, $8.00 per 10; 8 to 10 feet, $1.10 each, $10.00 per 10.

Cut-Leaved Weeping Birch—One of the most elegant of all weeping or pendulous trees. Its tall, slender, yet vigorous growth, graceful drooping habit, silvery white bark and delicately cut foliage presents a combination of attractive characteristics rarely met with in a single tree. Price, 5 to 6 feet, $2.50 each.

Horse Chestnut, White Flowering—The well-known European species; very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior. Price, 5 to 6 feet, $2.00 each, $17.50 per 10.

Mountain Ash—A handsome small tree with pinnate foliage and loaded in late summer with big clusters of bright red berries. Price, 5 to 6 feet, $1.50 each.

Mulberry, Russian—A low growing, very hardy tree, with beautifully cut leaves, and an abundance of medium size black berries. Fine for planting on the lawn. Grows 20 to 30 ft. high. Price, 5 to 7 ft, 65c each, $5.50 per 10.

ASH LEAVED MAPLE

Ornamental Trees Bring Shade As Well As Beauty.
Shade and Ornamental Trees (Continued)

**Poplar, Lombardy**—A tall, spire-like tree, used for screens and formal planting. Fast-growing, distinctly ornamental and beautiful. Price, 4 to 6 feet, 65c each, $5.00 per 10, $35.00 per 100; 6 to 8 feet, 85c each, $7.50 per 10, $50.00 per 100; 8 to 10 feet, $1.00 each, $8.50 per 10, $60.00 per 100; 10 to 12 feet, $1.25 each, $10.00 per 10, $75.00 per 100.

**Silver-Leaved Maple**—Foliage bright green above, silvery underneath. Form of growth spreading. Grows very large. Price, 8 to 10 feet, $1.00 each, $8.50 for 10, $75.00 per 100.

**Tea’s Weeping Mulberry**—The most graceful and hardy weeping tree in existence. Forms a perfect shaped head, with long, slender, willowy branches, drooping to the ground. Price, 5 ft., $3.00 each.

**Wier’s Cut-Leaved Maple**—A beautiful form, with deeply cleft and divided leaves; branches pendent, often sweeping the ground. Price, 6 to 8 feet, $1.50 each; $12.50 for 10.

---

**Hardy Ornamental Vines**

YOUR home planting will not be complete without at least a few Ornamental Vines. Not only do they add beauty to your home plantings, but also afford shade and protection to your porch, arbor and pergola.

When planting close to a building remove the earth to the depth of at least a foot and replace with good rich garden soil.

- **Ampelopsis Veitchii** (Boston Ivy)—For covering buildings of brick and stone; clings tightly to the smoothest surface. Bright green leaves, changing to brilliant coloring in fall. 60c each.
- **Chinese Purple Wistaria**—Beautiful popular species, with racemes of pale lilac flowers borne in great profusion in May. Graceful climber for training on porches or arbors. Stems grow quite large, climb high and twine tightly. Growth very rapid. 60c each.
- **Chinese White Wistaria**—In all respects similar to the species, except in color of the flowers, which are white and borne in great profusion, making a splendid show. 75c each.
- **Clematis Henryii**—Single, white Clematis; very large, fine flowers; grows rapidly; blooms freely. $1.00 each.
- **Clematis Jackmanii**—Single. Very large; deep purple; forms a perfect mass of richest bloom. $1.00 each.
- **Clematis Paniculata** (Sweet-scented Japan Clematis)—Flowers medium size, fragrant, pure white; borne in immense sheets in September. 50c each.
- **Dutchman’s Pipe** (Birthwort)—Large, heart-shaped leaves and quint, pipe-shaped green flowers. $1.00 each.
- **Hall’s Japan Honeysuckle**—Flowers white, bloom from July until winter. 50c each.

Evergreens

Evergreens are the aristocrats of the home grounds. No attempt is made to acclaim extravagantly the uses and beauty of the conifers, but knowing the plants as we do, with their faults and virtues, there is not a group of plants that holds for its admirers quite the charm that the evergreens do.

American Arbor Vitae—Much used for hedges, screens, singly on lawns, and in tubs for porches, etc. It is a handsome little tree, and if allowed to grow naturally will be quite tall and pyramid-shaped. Can be trimmed and kept in any form and height. In the summer the foliage is bright green above, yellowish beneath, and when winter comes this changes to the richest tones of brown and bronze. Price, 18 to 24 inches, $1.00 each, $9.00 for 10, $75.00 per 100; 2 to 3 feet, $1.50 each, $12.50 for 10, $100.00 for 100; 3 to 4 feet, $2.00 each, $17.50 per 10, $150.00 per 100; 4 to 5 feet, $3.00 each, $27.50 for 10, $250.00 per 100.

Irish Juniper—Junipers are handsome evergreens. Always neat and clean. This variety grows exceptionally slim and column-like. The branches grow almost straight up, and a 7 or 8-foot tree will not be more than a foot and a half thick. Price, 2 to 3 feet, $3.00 each, $27.50 for 10; 18 to 24 inch, $2.50 each, $17.50 per 10.

Make your orchard and garden more productive with a windbreak of American Arbor Vitae.

Norway Spruce—A lofty, elegant tree of perfect pyramidal habit, remarkably elegant and rich. As it gets age, it has fine, graceful, pendulous branches. It is exceedingly picturesque and beautiful. Very popular and should be largely planted. One of the best evergreens for hedges. Price, 18 to 24 inch, $1.00 each, $9.00 per 10, $75.00 per 100; 2 to 3 feet, $1.50 each, $12.50 per 10, $100.00 per 100; 3 to 4 feet, $2.00 each, $17.50 per 10, $150.00 per 100.

Fruit Growers Attention

Progressive fruit growers find that a hedge of American Arbor Vitae or Norway Spruce planted on the windward side of their orchard or garden brings increased returns far beyond the cost of the Evergreens. Many growers of bush fruits and garden truck enclose their patch or garden completely with an Evergreen hedge of this kind. If you will observe carefully, you will note that the orchards that pay the biggest returns are those that are given protection by a hedge of this nature.

We have this year not only the finest but one of the largest blocks of Norway Spruce and American Arbor Vitae that we have ever grown, and can make prices lower than trees of equal quality can be secured elsewhere. Let us know how long a hedge you wish to plant and we will quote you special rock bottom prices.

Do not overlook our bargain prices on Norway Spruce and American Arbor Vitae.

2½ to 3 Ft., 2 Yr., Strong Bushes $0.45 $4.25

Common Purple Lilac (Syringa Vulgaris)—Similar to white except that the twigs are a little more slender and the bloom is a pinkish-purple; a most profuse bloomer. Price, 2 to 3 feet, 55c each, $5.25 per 10.

Common White Lilac (Syringa Vulgaris Alba)—Stocky, strong grower and exceedingly hardy. The bloom is in large white clusters and very fragrant. Thrives well in all localities. Price, 2 to 3 feet, 70c each, $6.50 per 10.

Deutzia, Double-flowering (D. Crenata flore pleno)—Flowers double white, tinged with rose. One of the most desirable flowering shrubs in cultivation.

Deutzia Gracilis (Slender Branched Deutzia)—A dwarf variety well adapted to planting in cemetery lots and small lawns. It blossoms in June; the flowers are white. Price, 18 to 24 in., 45c each, $4.25 per 10.

Deutzia, Pride of Rochester—A new variety. Blooms in May, double, white tinted with rose on the edge. It excels in size of flowers, profusion of bloom and vigorous growth.

Double Altheas (Rose of Sharon) — From midsummer until frost, when few other shrubs are in bloom, the Althea blossoms freely. Grows 4 to 6 feet; large foliage and very large flowers; hardy. Can supply double varieties in these colors; Purple, Red, White, Pink.

See illustration of Everblooming Hydrangea on inside back cover.

See illustration of Everblooming Hydrangea on inside back cover.
Flowering Shrubs (Continued)

Japan Quince—Grows 6 to 8 feet high but will stand any amount of shearing. Completely covered with dazzling scarlet flowers in May. The fruits which follow later are Quince-shaped and quite fragrant. **Strong 2 Year Bushes, 70c each; $6.50 per 10.**

Pink Flowering Almond—An exceedingly attractive Spring flowering Shrub with beautiful double pink flowers early in the Spring before the leaves appear. Grows 6 to 8 feet high. **Strong 2 Year Bushes, 2 to 3 Feet, 75c each, $7.00 per 10.**

Snowball (Viburnum)—A well-known favorite Shrub, with globular clusters of white flowers, blooming the latter part of May. This good old and sure-flowering Shrub is planted perhaps more extensively than any other. **Strong 2 Year Bushes, \( \frac{2}{3} \) to 3 ft., 55c each, $5.25 per 10.**

Spirea Anthony Waterer (Dwarf Crimson Spirea)—A most beautiful variety of Bumalda. In habit of growth it is the same as its parent. The flowers are crimson in the bud and when first open, fading afterwards to a deep pink. It blooms about the close of June; is useful for edging, planting in masses, or as a single specimen where a low, bushy Shrub is required. **Strong 2 Year Bushes, 18 to 24 in., 50c each, $4.75 per 10.**

Spirea Callosa Rosea—Has large panicles of deep rosy blossoms; grows freely; blooms nearly all summer.

Spirea Prunifolia—A very beautiful variety, flowers white and double. A very profuse bloomer in May. Foliage turns a very beautiful brown color in autumn. Hardy and desirable.

Spirea Van Houttei—Finest of the spireas, giving a most graceful appearance even when out of bloom. The flowers are pure white and borne in dense clusters along the whole length of the branches, often weighing them to the ground. One of the finest ornamental shrubs. Excellent as a single lawn plant, or for grouping with other shrubs; also a fine hedge plant. **See inside back cover for illustration. Strong 2 Year Bushes, 1 to 2 ft., 15c each, $1.25 per 10, $10.00 per 100; 2 to 3 ft., 25c each, $2.00 per 10, $18.00 per 100; 3 to 4 ft., 40c each, $3.50 per 10, $25.00 per 100.**

Syringa (Lemoinei Erectus)—A charming variety of upright growth. Flowers small, yellowish white, fragrant, more clustered than the older sorts, completely covering the Shrub.

Weigela Candida—The very best of all white flowering weigelas. Flowers pure white and produced in great profusion in June; continues to bloom during the entire summer.

Weigela D. Eva Rathke—Fine variety. Rich, deep scarlet blossoms which follow a week after most other varieties.

Weigela Rosea Nana Variegata (Dwarf)—Leaves margined creamy white. Flowers pink.

The New Everblooming Butterfly Bush

**New Everblooming Butterfly Bush (Buddleya Variabilis Magnifica)**—Several years ago this was imported from Europe. The name BUTTERFLY BUSH was applied to it because it seems to attract butterflies in large numbers, not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vying with it in brilliancy of color. This Shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome Bush, which the first year often attains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-covered flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. It generally commences to flower in June and continues each season until severe frosts nip it. **BARGAIN PRICES ON BUTTERFLY BUSH**

**Strong plants, 30c each; $2.50 per 10; $20.00 per 100.**

Bay Ridge, Brooklyn, N. Y.

Kelly Brothers Nurseries,
Dansville, N. Y.

Gentlemen:

My order of Rose Bushes received and I find the plants in a healthy condition.

I thank you for your service and soon hope to show my satisfaction by sending you another order.

Yours truly,

WILLIAM B. BECKER.
Beautiful blooms like this can be had in a grand assortment of colors.

**Hardy Phlox**

THIS is one of the most useful varieties for summer decoration, the colors varying from pure white to deep crimson and purple. They are not at all particular as to soil and are exceedingly hardy. Once planted, they require no further attention for several years, but it is advisable to renew them about every fourth or fifth year.

The flowering period is from the early part of July to the middle of September and they grow to a height varying from one to three and even four feet. If the first blossom spikes are cut as soon as over, a second crop of blossoms extending until late in the fall may be expected.

Recent improvements have greatly increased the size of the heads and of the individual flowers, in fact, no flower has been more wonderfully improved in recent years.

For brilliant, bold color, the Phlox are almost indispensable and the great range of colors offer many possibilities. Our collection contains the finest of the new introductions. The colors we offer are very beautiful and striking and the individual blossoms are, in many cases, two or three times the size of the older Phlox.

Following is a list of varieties of Phlox we can furnish.

LaVague—An improvement over older varieties of similar color, with immense conical heads borne in great profusion. Warm mauve with emphatic carmine eye, giving a general effect of lilac.

Thor—A very beautiful shade of deep salmon-pink-suffused and overlaid with a scarlet glow, aniline red eye.

Compte—A very beautiful dark purple variety.

R. P. Struthers—Rich flame color, will not streak or fade. One of the very best varieties.

Miss Lingard—Purest white, pale pink eye. Most graceful panicles.

Mrs. Jenkins—Pure white, immense panicles, free bloomer, large individual flowers.

BORDER EFFECT OF HARDY PHLOX
Kelly's
Gorgeous
Peonies

Each  
Strong Clumps $0.50

Ten  
$4.50

A noble flower, almost rivaling the rose in brilliancy of color and perfection of bloom. The first point in its favor is hardiness. In the severest climate the plants require no other protection than that which they afford themselves. Freedom from all diseases and insects is an important argument in favor of their cultivation. Each succeeding year adds to their size and beauty. No other flower is so well adapted for large, showy bouquets. The peony may be planted either singly on the lawn or in borders. It flowers early in June. Our collection has been made with great care and includes the best and most distinct varieties.

Duchess de Nemours—Large and full—the most nearly pure white.
Eugene Verdier—An excellent cutting sort, with broad, full flowers without noticeable guard petals. White, evenly suffused shell-pink.
Festiva Maxima—About the largest and undoubtedly the most popular peony of them all. High built flowers borne on long, stiff stems; the purest white, inner petals slightly tipped carmine.
Louis Van Houtte—Large blooms, very double, bright crimson.

LOUIS VAN HOUTTE PEONY
A Gorgeous Red of Unusual Brilliance

Queen Victoria—The broad guard petals are a pretty blush-white; center white, slightly edged pink.

Ornamental Hedges

**BARBERRY THUNBERGII—Japanese Dwarf Barberry**

A very attractive dwarf shrub, barely 3 feet high under the best conditions. Dense in growth, yet graceful on account of its drooping branches. Its yellow flowers are borne on long stems followed by scarlet berries in great profusion, clinging through most of the winter. The leaves color to scarlet and gold in the autumn. Very desirable for planting as single specimens and used extensively in foundation plantings, or in borders planted in front of taller-growing shrubs. Very desirable for planting in corners where sidewalks meet. For a hedge not over 2 to 3 feet high, this makes a very desirable shrub. Very hardy. As a hedge, set bushes 2 feet apart.

**California Privet**—An almost evergreen shrub of dense, shapely habit, with shining, dark green foliage and a few minute flowers in June. Universally popular as a hedge plant because it stands trimming well and can be kept at any height or in any shape desired. The most desirable shrub for a hedge 3 to 5 feet high. Usually planted in single rows 10 inches apart, but where a broad hedge is desired, can be set in double rows, the rows 1 foot apart with the bushes 1 foot apart in each row, but alternated or staggered so as to come 6 inches apart in the hedge. Untrimmed, California Privet grows upright to 8 to 10 feet and makes a very fine windbreak for the vegetable garden. Excellent for planting alone as single specimens.

Everblooming Monthly Roses

HYBRID TEAS

THIS class of Roses is commonly known as Everblooming or Monthly Roses on account of their long blooming season, beginning in June and continuing until frost. They are by far the most desirable and popular varieties. Require protection over Winter in the extreme North. This protection consists of simply mounding up each bush with a mound of earth 8 or 10 inches high. Should be planted from $1\frac{1}{2}$ to 2 feet apart.

**COLUMBIA—A Rose of Unusual Beauty**

Columbia (H. T.)—A new rose that has proved to be one of the finest of outdoor pink roses. The color is glowing pink. Plant is strong and sturdy and almost thornless; heavy, luxuriant foliage. Very free-flowering. We recommend Columbia very highly.

**Gruss an Teplitz (H. T.)**—The color is brightest scarlet, shading to deep, rich, velvety crimson. It is very fragrant, the freest grower and most profuse bloomer. The mass of color produced is wonderful and the foliage is extremely beautiful, all the younger growth being a bronzy plum-color. A queen among scarlet bedders.

**Killarney Pink (H. T.)**—A vigorous growing Hybrid Tea of recent introduction, with so many good points in its favor that it has become a standard variety. Its long, pointed buds, excellent substance and delicious odor recommend it to every lover of the rose. Color flesh pink, shaded with white and suffused pale pink.

**Killarney White (H. T.)**—Identical with Killarney Pink in size, shape and fragrance, but pure white.

Port Washington, L. I., N. Y., May 15, 1929

Kelly Bros. Nurseries, Dansville, N. Y.

Gentlemen:

Have received the Evergreens, Rose Bushes and Umbrella Tree, and wish to thank you. They appear to be very fine healthy plants.

Yours truly,

C. D. SCHANCK

North East, Pa., May 1, 1929

Kelly Bros. Nurseries, Dansville, N. Y.

Gentlemen:

I received the trees Monday, in fine shape. Thanking you for prompt service, I am,

Yours very truly,

W. A. MOYER

LOS ANGELES—Should Be In Every Garden

Our Rose Bushes are all strong 2 year field grown bushes ready to bloom the same season planted.
Everblooming Monthly Roses (Continued)

Lady Ashtown (H. T.)—Deep carmine-pink, shading to yellow at base of petals. Flowers large, full, high-centered; continuous bloomer; a good rose always recognizable by its beautiful recurved petals.

LaFrance (H. T.)—This is probably the most popular rose in cultivation. Both buds and flowers are of lovely form and grand size, exceedingly sweet. Color fine peach-blossom, elegantly clouded with rosy flesh. Begins to bloom while very small, and continues bearing until stopped by freezing weather.

Los Angeles (H. T.)—One of the grandest all-round roses of American origin ever put on the market. Flowers large and continuous, in color a flame pink, toned with coral and shaded with translucent gold at the base of the petals.

Mme. Butterfly (H. T.)—Bright pink shading to apricot and gold. Blossoms are large and very beautiful. Very perfect bloomer.

Ophelia—Considered by many a leading garden rose. Delicate salmon flesh, shaded with rose. Long, pointed buds on stiff stems. Free bloom, unusually attractive foliage.

Premier (H. T.)—A seedling from Ophelia. A deliciously fragrant, beautifully formed, rich dark pink rose of good size. Stems long, strong and thornless; plant robust.

Radiance Pink (H. T.)—An erect, strong-growing rose, producing an abundance of blossoms. In color of flower it is both unique and beautiful—bright carmine rose with opal and coppery reflections. As its name suggests, it is radiantly beautiful.

Red Radiance—One of the leading if not the leading red rose. It is a vigorous grower, unusually hardy for a rose of this class and produces blooms continually. The blooms are of a deep red with an intense fragrance.

Sunburst (H. T.)—A handsome, long, yellow bud, opening to cup-shaped flower of light sulphur yellow. Plant strong and spreading, with few thorns.

Souvenir de Claudius Pernet—Without any question this is the outstanding yellow rose and probably the most popular of all roses. Many yellow roses fade out when the petals fully unfold and are exposed to the sun. This is not the case with the Claudius Pernet. The long pointed buds open up to large, full, sun-flowery yellow blooms. The buds are vigorous and erect growers.

Prices of strong, 2 year bushes, 95¢ each; 10 for $8.50.

No. 5—Climbing Rose Collection

Five Glorious Climbing Roses

All for $2.45

1 Crimson Rambler—Crimson
1 Climbing American Beauty—Pink

1 Yellow Rambler—Yellow

(Regular Catalog Price—$3.00)

Special Collection Price, $2.45

Beautify your home with a garden of roses.
Hybrid Perpetual Roses

This class of Roses is extremely hardy, requiring no protection, blooming tremendously in June and sometimes sparingly until Autumn. Should be planted 2 to 2\(\frac{1}{2}\) feet apart.

Prices of all Varieties of Hybrid Perpetual Roses
(Except Frau Karl Druschki)

Strong, 2 Year Bushes, 75c each; $6.50 per Ten.

American Beauty (H. P.)—Flowers very large, of beautiful form and very double. Color a deep rich rose. Fragrance delightful, resembling La France or the old-fashioned Damask Rose; each shoot produces a bud.

Frau Karl Druschki (Sometimes called Snow Queen) (H. P.)—A wonderful rose—fine, large, free-flowering, hardy, white. Extraordinarily strong-growing, branching freely. Foliage large, of heavy texture, but the glory is in its flowers, which are immense, and produced with great freedom during the whole season—hundreds of magnificent blooms, full, very deep, and double, and of splendid substance. Petals broad, long and saucer-shaped. Buds egg-shaped, long and pointed. Pure, snow-white, without a tinge of yellow, pink or any other color. This great rose is listed by some as Hybrid Tea, as it possesses some of that strain. Price 85c each, $7.50 per 10.

General Jacqueminot (H. P.)—The leading rose. Deep, brilliant shaded crimson, with large petals, globular with high center. A well-known favorite—one of the best and planted by all who plant roses.

Prince Camile De Rohan (H. P.)—This is a magnificent rose, celebrated the world over for its large, handsome, fragrant flowers and the freedom with which they are produced. The color is a deep, rich velvety crimson passing to intense maroon.

Baby Rambler Roses

This type has been in existence only a few years, but so much were they needed and so admirably do they meet the need, there is no class of roses today being so widely planted nor so high in general estimation. They are such splendid, hardy, showy compact bedders; they keep their color so well and continue in full bloom through such a remarkably long season, there is no end to the uses to which they may be put.

**Crimson Baby Rambler**—This is the original dwarf baby rambler. One of the best hardy bedding roses in existence. The foliage is dark, glossy green and is remarkably free from insects and fungus. The flowers are borne in clusters of 20, 30 or more—in every way resembling the blossom of the climbing Crimson Rambler. It blooms outdoors from May to November and indoors the year around.

**Pink Baby Rambler**—The showiest and prettiest of the pink "baby" roses. This charming and dainty little variety is of beautifully rounded habit and is a huge bouquet of brilliant bloom. The color is irresistible.

**White Baby Rambler**—As delicately tinted and as full of clusters as any Polyantha rose. Its pure white flowers are perfectly double, and bloom with the unceasing freedom of the reds and pinks of this class.

Buy direct from Kelly and save money.
Helpful Suggestions to Planters Setting Out Young Trees

Prepare rich, deep bed of mellow soil and have the land sufficiently drained to relieve the roots from standing water. To insure a fine growth, land should be in as good condition as is required for a crop of corn, wheat or potatoes.

We use great care in digging and packing, but the loss of some small roots and fibres is unavoidable. If stock is properly prepared before it is planted, no permanent injury will result from this. The preservation of the natural balance between top and roots renders a vigorous cutting back of the former absolutely necessary in most cases. Therefore, prune off broken ends of roots (a smooth cutting root granulates and extends sooner than one broken off) cut back the tops to the extent of one-half the previous season's growth, taking care at all times to prune in such a manner as will tend to develop a head sufficiently open to admit air and light freely.

Evergreen and other ornamental trees should be pruned very little. If not ready to plant when the stock arrives, place roots in a trench and cover them with mellow earth well packed.

Planting and Mulching and After Culture

Make the holes large enough to admit the roots without any cramping and deep enough to bring the tree to its natural depth. The fine surface soil should be used in covering the roots and this should be carefully worked among them.

If the ground is dry, it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots by exerting the full weight of the plant, and open it up so that there will be no opportunity for dry air or frost to enter and destroy roots deprived of their natural protection. Failure to pack the earth solidly is a most frequent cause of failure in the planting of nursery stock. Fill the holes full enough to be even with the surrounding surface as the fresh earth settles.

Always remove the label when planting. If this is left until tree is grown the connecting wire often cuts into and destroys the tree or branch to which it may be attached.

When planting dwarf trees, set them low enough to cover the stock upon which they are budded, three or four inches. When trees or bushes are planted they should be mulched, or covered with a layer of coarse manure or litter from three to six inches deep for a space of about two feet more in diameter than the roots extend. This keeps the earth moist and at an even temperature.

Distances for Planting

| Standard Apples | .40 feet apart each way |
| Standard Pears and Strong Growing Cherries | .20 feet apart each way |
| Duke and Morello Cherries | .16 feet apart each way |
| Standard Plums, Peaches, Apricots and Nectarines | .10 to 12 feet apart each way |
| Dwarf Pears, Dwarf Apples and Quinces | Rows of 10 to 16 feet apart; 7 to 16 feet in rows |
| Grapes | .10 to 18 feet apart each way |
| Currants and Gooseberries | .4 feet apart |
| Raspberries and Blackberries | 3 to 4 feet by 5 to 7 feet |
| Strawberries, for field culture | 1 by 3 to 3 1/2 feet |
| Strawberries, for garden culture | 1 by 3 feet |
| Asparagus in beds | 11/2 feet |
| Asparagus in fields | 1 by 4 feet |

SQUARE PLAN for Setting an Orchard. Open circle represents permanent; 40 ft. apart; and dots fillers, 20 ft. apart. The latter to be removed in twenty years. These are distances adopted by most planters.

TRIANGULAR PLAN for Setting an Orchard. A permanent, set 40 ft. apart. C and B fillers, 20 ft. apart. C fillers to be removed in fifteen years. B fillers to be removed in 25 years. These are distances adopted by most planters.

We will be glad to be of any service we can in solving your planting problems.
How to Order from Kelly Bros. Nurseries

10% Cash Discount on Cash Orders Received On or Before March 25.
After This Date, 3%

This Catalog Is Our Salesman

As our orders are shipped in the rotation in which they are received we advise the placing of orders early. If for any reason an order is to be shipped on a specified date, make a note on the order and we will comply with the request if it is at all possible.

We pack and ship all winter to Southern states, though our regular spring packing and shipping season usually opens here about the first of March and continues well into the month of May. The planting season is not regulated by any particular month nor by the state of vegetation where the planting is to be done, but by the condition of the trees to be planted. For that reason trees can be shipped with safety from Dansville to localities several degrees south even if they do not arrive until the ordinary transplanting season in that locality has passed.

Terms—How to Remit

Cash with order except on large orders when satisfactory reference must be given and the order accompanied by one-fourth cash, and shipment will be made C. O. D. the balance.

For the benefit of customers who order early but who do not care to spare all of the money when order is sent, we will accept early orders accompanied by one-third cash and reserve stock, balance of the amount to be sent us when stock is ordered shipped.

Prices in this catalog supersede all previous prices and are subject to change without notice.

Remittances should be made by Post Office Money Order, Express Money Order, New York Draft, Personal Check, or Registered Mail. We otherwise disclaim all responsibility.

Every Tree Guaranteed

We guarantee every tree to be up to the grade specified, or better. Many times trees are sold by height only. This we believe to be very misleading, as we have seen trees which belong to the second or third grade as graded by caliper, sold for first grade, as they had the required height. We grade and sell our trees both by height and caliper, and believe this the only way giving entire satisfaction to the planter.

Boxing and Packing

We box and pack all orders without charge. They are put up in boxes or bales lined with heavy paper to guard against drying out of the stock. Trees and plants are packed in moist excelsior and straw. This is expensive, but good packing pays the customer and pays us, for we guarantee the arrival of stock in good condition.

Rates

We allow hundred rates on lots of fifty or more trees, providing your order does not call for less than ten trees of any one variety.

Small Orders

Because of the increased cost of land, labor, implements, packing material, etc., there is no profit in orders for less than $2.00, and we cannot accept orders for smaller amounts.

Direct Personal Supervision

Every department, from the planting, propagating and maturing of the trees to the selling through our catalog is in the direct charge of a member of our firm. Following are the names of the members and the department to which each gives his attention:

JAMES A. KELLY—Selection and planting of seedlings.
EDWARD T. KELLY—Selection of scions and budding.
WILLIAM F. KELLY—Digging and grading of trees.
RICHARD A. KELLY—Selling through catalog and correspondence.
CLEMENT A. KELLY—Packing and shipping of orders.

It is easy to order from Kelly's.
MISREPRESENTATION of the cost of getting stock from us by freight or express is sometimes made by competitors. Remember, if you bought your stock delivered, or freight prepaid, that cost of such prepayment would be included in purchase price. Do not be influenced by agents or others who say the cost of transportation will bring our prices up as high as theirs, because that is not true. When you buy freight prepaid, you are not only paying the cost in another way but also in many cases you are paying the agent's commission.

Below you will find a statement of the freight rates to certain representative points. If you do not happen to live in any of the places mentioned, you can readily figure out what the rate would be to your station by comparison with a place about equally distant from Dansville, N. Y.
